Customers we support

Our history

Founded in 2008, Regal Cloud quickly became market leaders in Data Storage and Datacentre infrastructure talent. We've supported and enabled our customers as they've embraced Public Cloud solutions to deliver critical IaaS, PaaS and SaaS services to their businesses. Our bespoke product offering has been designed to solve real world problems and provide Technology Leaders a world class talent-based solution to achieve their Cloud Transformation objectives.

The perfect match

At Regal Cloud, we embrace and respect clients brand values and culture, which then allows us to perfectly match rather than just skill match for a role or multiple roles which need to be fulfilled. Hiring somebody right for the job is crucial, for both candidates and clients.

This knowledge allows us to provide class leading solutions to our clients.

Success

We bridge the gap between legacy recruitment agencies and consultancies; our offering combines market-leading recruitment technology with in-depth industry knowledge and relationships

Our client

Regal has a great professional attitude to recruitment. Their ability to quickly find relevant high-capability individuals has really helped accelerate development. Talent is the heart of any business and having the ability to attract and retain it is key. I would work with Regal again on building great teams.
